

Mission One Million Trees dream

YOUNG ASPIRANTS MEET

Science Outreach & Career Shaping Event

25th June, 2024

IBS Outreach Grant

Science outreach and communication is a responsibility for scientists across career stages and disciplines. It is increasingly important to build interactions between scientists and the broader public.

Despite value and relevance, scientist-led outreach initiatives are few. IndiaBioscience (IBS) strives to promote the practice of science outreach among the Young Investigator community in India via the IOG.

We as a team have been awarded (among total 5) the "4th IOG for the year 2023-24"

Science Outreach & Career Shaping Event
